

Hit Song Analysis Report sample

HitSongScience.com reports are based on the mathematical properties of the audio uploaded to the web site. Therefore, the quality of the audio we receive has a strong effect on the results detailed in the report. This includes but is not exclusive to every step of the recording process, from the original studio recording to the MP3 encoding. The uploaded audio must be of the right format: MP3 at 128 kBits, 44.1 kHz, Stereo or Joint Stereo.
